Step 1: Determine the band size:

- Measure circumferentially below the bust where a regular bra sits.
- Drop the tape 5 - 8cm (2 - 3") and measure around the bottom of the rib cage.
- Use the larger of these two measurements as the band size. Round odd numbers up. i.e.: 31 = 32

Step 2: Determine the cup size:

- Measure circumferentially around the fullest part of the bust.
- Subtract the determined band size measurement from the bust (either 1a or 1b depending on which one is larger) measurement to determine cup size.
