

JOBST® Elvarex® Plus

Feel the difference in seamless 3D!

Custom-made flat-knit compression garments for the management of lymphatic diseases of the hands and feet

JOBST®

Comfort, Health and Style!

3D Comfort, Compression and Technology

JOBST® Elvarex® Plus

An even higher level of quality and performance

Comfortable, effective, and proven compression technology is critical for successful lymph therapy. For over 60 years, **JOBST® Elvarex®** has set the standard for unsurpassed compression performance. And now, we have elevated our effectiveness with a true “Plus”.

The three brands, JOBST® Elvarex®, JOBST® Elvarex® Soft and JOBST® Elvarex® Soft Seamless, are compellingly unique and long-lasting with medically effective compression.

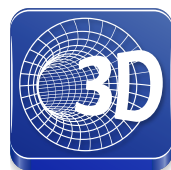

The breadth and depth of the flat-knit assortment allows the products to be perfectly adapted to individual patient needs and stand for decades of competence and safety. The new flat-knit generation of **JOBST® Elvarex® Plus** continues in this tradition, while setting new and innovative standards:

Seamless Comfort

- Maximum range of motion without chafing or pressure points
- Outstanding wearing comfort and high wear resistance

Long-term satisfied customers thanks to wear-resistant compression garments

3D Knitting Technology

- Ideal anatomical fit that wears like a second skin
- Great fit between the fingers and toes with exclusive “knit-to-shape” zones at these sensitive areas

Perfectly treated customers right from the onset

JOBST® Elvarex® Material

- Effective edema control with reliable therapeutic outcomes
- Every movement creates a micro-massage effect on the skin

Customers remain loyal through proven reliability

JOBST® Elvarex®:

The flat-knit assortment your patients can trust!

JOBST® Elvarex® Plus: The flat-knit compression garment of the future...today

Glove and foot cap

Next-generation performance for extremities

Seamlessly knit edge finishes at the fingers with a perfect border and highly wear-resistant.

The seamless construction provides ultimate comfort for extended wear and maximum range of motion without chafing or pressure points, ensuring superior wearing comfort and remaining highly wear-resistant.

The unique 3D knitting technology reproduces each body shape accurately and has revolutionized the market with compression garments of uncompromising quality that wear like a second skin.

Made from JOBST® Elvarex® Material for decades synonymous with reliable therapeutic outcomes.

Anatomically shaped finger gradient provides an excellent fit and makes the garment extremely easy to put on and take off.

Anatomically shaped palms ensure exactly seated contours because they mold their fit accurately to individual protrusions and depressions. They minimize limitations in routine movements.

Technologically knit-to-shape zones in the spaces between the fingers and toes ensure an optimum fit at particularly sensitive areas – for outstanding wearing comfort without any limitations.

The ergonomic shape at the thumb base helps prevent wrinkling in the webbing for an unimpaired grip and greater freedom of movement.

A pressure relief zone at the edges around the arm creates a good border and reliably controls compression.

Seamlessly knit edge finishes at the toes with a perfect border and highly durable.

Anatomically shaped toe gradient provides an excellent fit and makes the garment extremely easy to put on and take off.

3D knitting technology

creates features **with valuable benefits**

JOBST® Elvarex® Plus

for a care-free life

The gloves and foot caps of **JOBST® Elvarex® Plus** are members of a strong product family and feature a new highlight in the continuing Elvarex® success story.

For your patients, JOBST® Elvarex® Plus means greater quality of life through visible perfection and inner strength:

The gripping surface structure of the Elvarex® knitted fabric

- creates a micro-massage effect* on the skin with every movement
 - mobilization of edema and improved lymph drainage**

Elastodiene inlay yarn made in the Elvarex® yarn mix

- consistent and long-lasting compression
 - reliable edema control

Ergonomic fit in the spaces between the fingers

- technologically knit-to-shape zones at particularly sensitive areas
 - better wearing comfort and more freedom of movement

Anatomically shaped thumb base

- covers this sensitive area like a second skin
 - uncompromising, non-slip movement

Flat, seamless edge finishes on the fingers and toes

- prevent curling and reduce wear
 - reliable seat and robustness

Pressure relief zone at the edges around the arm

- controls compression
 - safe and reliable therapy with excellent wearing comfort

JOBST® Elvarex® Plus has succeeded in adapting the inner strength of the Elvarex® materials to the skin's sensory perception and the complex movements of hands and feet. With the unique 3D knitting technology, BSN-JOBST manufactures seamless compression garments that reproduce each body shape accurately and wear like a second skin.
